EXPERIENCE

Atlassian | Senior product designer

March 2024 - PRESENT

- **Spearheaded end-to-end UX/UI design for multiple complex experiences within the Atlassian Learning Platform** during a platform migration, shipping experiences used by tens of thousands.
- **Drove cross-functional alignment with Product Management, Engineering, and Business stakeholders**, raising the standard for collaboration through key communication touchpoints, resulting in faster, smoother product delivery.
- **Designed and shipped a major information privacy feature** that integrated across multi-billion dollar flagship products, adopted by major enterprise customers.
- **Orchestrated design sprints and delivered several major new automation features for Atlassian's flagship products** (Jira, Confluence), enhancing efficiency for the millions of users relying on these solutions.

Funsize co | Product designer

February 2020 - February 2024

Served as full-time designer across multiple large enterprise clients and high-growth startups. Drove end-to-end strategy, research, and visual/interaction design to successfully launch and scale complex B2B and consumer products.

- **Led design and UX strategy for fortune 500 vehicle manufacturer** for a new wireless charging application, resulting in a successful launch across Sweden and adoption by tens of thousands of drivers.
- **Spearheaded multiple end-to-end user research initiatives** (interviews, workshops) that established research-backed personas and a prioritized product roadmap for Volvo's in-car experience, significantly improving the team's customer understanding.
- **Drove the end-to-end UX/UI design for net-new feature within an enterprise video meetings product, impacting over 7 million end users.** Collaborated cross-functionally with Product Management and Engineering to successfully ship the new functionality and drive user adoption.
- **Drove the design and adoption strategy for net-new core components within enterprise design system, impacting development velocity for thousands of engineers supporting a multi-billion dollar networking solution.**
- **Delivered polished, high-fidelity designs for multi-billion dollar cloud networking solutions company, helping ship major new applications for thousands of highly technical users.**
- **Spearheaded focus group testing and analysis** to secure research-backed validation for updates to a complex cybersecurity software platform, ensuring a successful and secure product rollout.
